Moreover, parents play an important role in helping children distinguish true and false, good and evil, beauty and ugly by comparing the situation in TV programs and reality,. So I prefer to study in a group.

58. Is it important for students to attend class regularly or study by oneself?

I think it's more important for students to study by oneself. Firstly, classes given by teachers are designed for most of the students. You may find you are not getting enough from the class or you can't catch up with the class. In such a case, studying by oneself is crucial to improve your learning efficiency. Furthermore, studying by oneself will help you to find out your weak points as well as what you are good at, which is benefit to you to make schedule

and formulate your study plans. So I hold that study by oneself is more important.

Furthermore, mixed-type living style can also absorb students since freshmen can obtain more experience and suggestions from students of higher grades. As a result, it will low your study efficiency and can't prepare you very well for future development. Furthermore, the demand of job market definitely changes more frequently than your interests do. Furthermore, students wouldn't forget what they have learned and will be more focused on their classes when they return to

school if their vacation time is divided up throughout the year. And I also think short vacations are safe for students who have a travel plan. So I find many advantages of short vacations compared with a longer one.

64.在旅行时,有些人喜欢直接到达目的地,有些人却喜欢沿途一路上观光。

I prefer to take my time and enjoy the scenery along the way. Firstly, there can be some surprisingly beautiful sights on the way, and I don't want to miss it. It can be even better than my destination. In addition, trip is a way of relaxation instead of a job. So you don't need to rush yourself, otherwise I may already feel tired when I get to my destination. I'd like to relax from the moment I set out. So, that's my reason for sight-seeing along the way.

65.城市建设中应该保持 **old building** 呢还是应该用 **new building** replace **old building**

I support that old buildings be preserved because they are valuable for educational purpose and tourism. An old building usually can serve as educational sites for kid to learn the past culture of the city, or as reference for students of architecture. In addition, it also boosts the development of tourism, especially if the place is a historical heritage, which can bring a considerable income. And people have some place to go on weekends. For example, if the rescue needs more people or other tools, you should stop and think about where to get them. In addition, some imprudent actions may even deteriorate the situation. 71. Do you agree or disagree: Students should wear uniform in school?

I tend to disagree that students need to wear uniform in school. Firstly, wearing uniform doesn't represent a better performance in school. I think it doesn't matter what students wear as long as they are doing fine. In addition, school should encourage students to express themselves or develop their personality. School can make some restrictions to prevent certain inappropriate clothes. Asking students to dress the same everyday may have a negative influence on their psychology. So I don't support uniform wearing.

72. 打手机该不该在一些地方禁止?

I think it's necessary to forbid using mobile phone in some cases. For example in classes or meetings, the ringing is very disturbing. Although you may turn your mobile phone into the mute mode, it will distract you from classes thus reduce your study efficiency. And sometimes it's impolite to use a mobile phone in some public occasion such as important conferences. So forbidding using a mobile phone in some cases is good for you as well as the people surrounding you.

enhancing people's culture. So I support government invest money to build more museums and theatres.

74. 同不同意 People should always tell the truth .

I don't agree that people should always tell the truth, because sometimes lying doesn't definitely mean to harm others and is even necessary. For example, if you are taking care of a patient suffering from serious illness, it's important to give the patient hope, in such a case, in order to help the patient to release psychological pressure, modest lying is useful. Another example is in business or politics, people always adopt acceptable lies as negotiation strategy to win more benefits for their own side. So not telling the truth is ok and sometimes helpful.

75. Do you agree that we can judge a person by the appearance at the first glance?

I don't think it's reliable to judge a person by the first glance. Firstly, appearance doesn't represent all. The information of a person you can get from a glance is very limited. You can't tell many things just from the appearance, such as the past, hobbies, eating habits and so on. Furthermore, appearance lies, it may trick you. What you can get is partial, which may even lead to prejudice. A person who dress decently and talk sincerely doesn't imply he's definitely guiltless and kindly. So I support that one shouldn't judge a person just from the appearance.

76. Have a relaxed and unhurried life, yes or no?

I don't support having a relaxed and unhurried life. First of all, pressure engenders impetus. If you always keep living a relaxed life, you can learn nothing and even find life tedious, because you have no idea what you are living for. Furthermore, it's impossible for one to be relaxed forever. Life is full of chances and challenges. If you are used to an invariable and easygoing life style, you'll be not able to deal with the chances or emergencies in your life. That's why I oppose the relaxed and unhurried life style.

77. 学生在工作之前应该做 **part-time job** 或者 **summer intern** 来确定自己是否合适那份工作，同意否？

I agree that it's beneficial for students to have a part-time job or summer intern before applying for an occupation. Firstly, the importance for their future career is obvious, it helps students to be more familiar with the society. In addition, students will learn a lot that they can't obtain from academic books. They may be more concerned with the experience and knowledge accumulated outside school. Besides, students can develop their communicating skills with different groups of people in the society. So I support the idea to have a part-time job or summer intern.

78. 是否同意学生进入大学前有一个 **one-year** 的 **break**

I tend to agree that students having a one-year break before entering college. First of all, so many years of study and exams before college really cost energy, after graduating from high school, a long-term break will be beneficial for students both physically and mentally. Students can use the break to enjoy life and decide their future development. In addition, it's also a good chance for poor students to use the break to earn a certain tuition for their college study. So I support the one-year break before college.

79. Do you agree or disagree: "The most important lesson can't be learned in class."

I highly agree that the most important lesson can't be learned in class. Sometimes practical experience is more important. For example, a student major in chemistry may know the textbooks or chemical principles very well, but still can encounter numerous problems and difficulties in a real chemical experiment without any practice. In addition, practice is the only criteria of truth. What you have learned in class are very limited and even false, so you shouldn't be superstition about textbooks. Practice need to be paid more attention to.

80. Someone suggests school to cut the Recycling

I tend to disagree with cutting the recycling in school. Firstly, recycling can remind students of the importance of environmental protection. With a recycling system, students will discard garbage into the special recycling garbage boxes instead of throw them away randomly in campus. In addition, school can employ workers to deal with the garbage regularly, it can also provide a job chance for people with low-income. So for these two reasons, I support that the recycling in school should continue.
